WHO IS THE IT-ISAC?

The Information Technology-Information Sharing and Analysis Center (IT-ISAC) is the longest established private-sector partnership for information sharing in the IT Sector. Founded in 2000, we are a non-profit organization that provides a trusted forum for IT companies and those that leverage IT as a core business function to share information, manage risks, and collaborate on cyber incident response and strategy.

Our mission is to grow a diverse community of companies that leverage information technology and have in common a commitment to cybersecurity, to serve as a force-multiplier that enables collaboration and sharing of relevant, actionable cyber threat information, effective security policies and practices for the benefit of all.

We are the only ISAC that supports three critical infrastructure sectors - Information Technology, Food and Agriculture, and Elections. Our membership is comprised of security leaders from leading technology companies across the globe. We have built a network of relationships with trusted partners across the critical-infrastructure community and through this multidirectional sharing, we help companies manage risks to their enterprises and to the critical infrastructure community.

MEMBERSHIP BENEFITS

IT-ISAC membership is a cost-effective resource for companies to scale their cybersecurity programs. We provide analysis, intelligence, and effective practices that organizations otherwise may not be able to procure. Additionally, IT-ISAC membership comes with the following key benefits:

**Automated Sharing of Threat Intelligence:** Access to our intelligence management platform, TruSTAR, that stores, aggregates, and contextualizes, thousands of indicators each week. The platform enables automated sharing and members can leverage custom API and STIX/TAXII integrations to pull indicators into their security tools.

**Strategic and Tactical Analysis:** Curated reports developed by IT-ISAC analysts. These reports include daily reports that highlight and link to key security incidents, events, and vulnerabilities, weekly reports that highlight major events from throughout the week, weekly Vulnerability and Exploitation Reports (VEAR), breaking news reports, incident analysis reports, and quarterly trending malware reports.

**Incident Response:** Timely, incident-specific alerts developed by the IT-ISAC, security partners, and members. Members can also issue Requests for Assistance and Requests for Information to the IT-ISAC team, peer analysts in IT-ISAC member companies, and our global network of security professionals.

**Analyst to Analyst Exchanges:** Collaboration with analysts from peer companies to address common security challenges and threats. Your concern immediately becomes the concern of other members and partners.

**Education and Training:** Discounts on various CompTIA, EC-Council, and ISACA training and certifications, in addition to other educational resources.
INTELLIGENCE MANAGEMENT PLATFORM

IT-ISAC members leverage the TruSTAR intelligence management platform to identify and prioritize threats, and access automated sharing and threat analysis. Through this platform, members can customize the analysis of thousands of threat indicators shared each week, including those from the U.S. Department of Homeland Security, IT-ISAC Members, and IT-ISAC partners across the globe.

METHODS OF SHARING

The IT-ISAC has various avenues that members can use to share information. These include our Technical Committee and Special Interest Group Listservs, directly with our Operations Team, TruSTAR, a secure chat platform, or through our Technical Committee Meeting and Special Interest Group meetings.

Our Technical Committee meeting is held weekly and is a forum for the general membership to discuss important cybersecurity topics and share mitigation strategies. Our Special Interest Groups meet bi-weekly and provide an opportunity for companies to collaborate on issues affecting their specific group’s topic of expertise.
A core feature of IT-ISAC membership is the ability to collaborate with subject matter experts from other companies on common security topics. SIG members collaborate through bi-weekly virtual meetings and work on important projects related to the group’s concentration.

We currently offer five SIGs listed below.

**FOOD AND AGRICULTURE**
The Food and Agriculture SIG provides a forum for our members in the Food and Agriculture industry to share information on common security threats and collaborate on effective mitigations. The SIG shares information through virtual meetings and through a dedicated enclave in TruSTAR.

**ELECTIONS INDUSTRY**
The Elections Industry SIG supports voting technology providers by giving them an industry-only forum to share information about threats to their enterprises and systems, and to collaborate on election security challenges.

**SECURITY INTELLIGENCE**
The Security Intelligence SIG brings together the senior level analysts from our member companies to exchange ideas, strategies, techniques, and information regarding advanced threat detection and enterprise risk management.

**INSIDER THREAT**
The Insider Threat SIG is designed for those who are responsible for building and managing Insider Threat programs within their companies.

**PHYSICAL SECURITY**
The Physical Security SIG is composed of security and business continuity professionals from our member companies. This group also shares effective strategies for responding to physical security threats relating to natural disasters, accidents, terrorism, and other matters impacting business continuity.

To learn more about membership, visit [www.it-isac.org](http://www.it-isac.org), email us at [membership@it-isac.org](mailto:membership@it-isac.org) or contact our Executive Director Scott Algeier at [salgeier@it-isac.org](mailto:salgeier@it-isac.org) or [703-385-4969](tel:703-385-4969).
IT-ISAC members leverage the TruSTAR intelligence management platform to identify and prioritize threats, and access automated sharing and threat analysis. Through this platform, members can customize the analysis of thousands of threat indicators shared each week, including those from the U.S. Department of Homeland Security, IT-ISAC Members, and IT-ISAC partners across the globe.

Mary Ann Davidson, Chief Security Officer - Oracle

Collaborating through IT-ISAC provides an effective force-multiplier for us. Learning from each other enables everyone to more quickly adjust strategies and tactics. Plus, IT-ISAC's global network of trusted partners provides us regular access to sensitive indicators.

Peder Jungck, VP GM Intelligence Solutions - BAE Systems

There are certain resources that are invaluable for InfoSec professionals. The IT-ISAC is one of these in that it provides timely, detailed, and actionable intel. Their top-notch Operations Center is a trusted source of information with their Daily Cyber and weekly Vulnerability and Exploitation Reports. The IT-ISAC hosts weekly online meetings, blogs, podcasts, and many special interest groups. They also provide steeply discounted educational opportunities with allied partners—a true boon in our industry as we must continually be learning new things to keep up.

Lillian Isacks, IT Security - GrammaTech
