## IT-ISAC Announces 2021 Officers

*Industry leaders from BAE Systems, Qualys, and Bunge to serve as IT-ISAC Executive Leadership*

**WASHINGTON, DC** (1 July 2021) - The Information-Technology Information Sharing and Analysis Center Board of Directors has announced its elected officers for 2021.

Peder Jungck, Vice President and General Manager of Intelligence Solutions for BAE Systems, was elected to a one-year term as IT-ISAC President. This will be Jungck's 5th term as IT-ISAC President.

"I'm pleased to be serving as IT-ISAC President for another year," said Jungck. "I'm excited to see IT-ISAC continue to grow, scale, and bring value to organizations as a force multiplier to members tailored in threat intelligence special interest groups. The more information and data we share, the more resilient we will be against the evolving threat landscape."

Ben Carr, Chief Information Security Officer for Qualys, was elected to a one-year term as IT-ISAC Vice President. The IT-ISAC welcomed Qualys as a Foundation Gold Member and Carr to its Board of Directors in 2020.

"As a longtime supporter of IT-ISAC and its mission, I am honored to join the board. I look forward to working with the team to further IT-ISAC's commitment to sharing relevant, actionable cyber threat information, effective security policies, and practices for the benefit of all," said Ben Carr, CISO at Qualys.

Carr and Jungck will join Steve Stellmacher on the ISAC's executive leadership team. Stellmacher currently serves as Treasurer and is the Director of Global Cyber Threat Defense Operations for Bunge.

"Thanks to the leadership of our Board and Executive Committee, and the support of our members, the IT-ISAC had a great year in 2020, despite all the challenges the year imposed,"

noted IT-ISAC Executive Director Scott Algeier. “We have a leadership team and Board that fully supports the IT-ISAC mission, so I am immensely optimistic about 2021 and beyond.”

###

**ABOUT IT-ISAC:** About IT-ISAC: Founded in 2000, the mission of the Information Technology-Information Sharing and Analysis Center (IT-ISAC) is to grow a diverse community of companies that leverage information technology and have in common a commitment to cybersecurity and serve as a force-multiplier that enables collaboration and sharing of relevant, actionable cyber threat information, effective security policies, and practices for the benefit of all. The IT-ISAC global membership base consists of leading companies from three critical infrastructure sectors—IT, food and agriculture, and elections.
